Content Sharing via Firefox

Use the Share button to share your screen with other participants in a videoconference.

Only one participant can share at a time. After the first participant shares their screen, subsequent shares must be negotiated verbally amongst the videoconference participants.
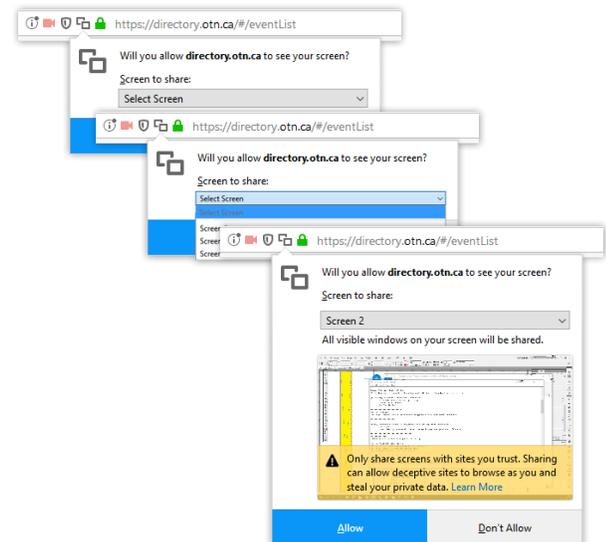

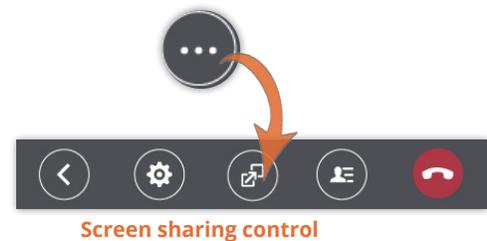

Sharing via Firefox

1. To view the Share button, click the ⋯ **More** button.

2. To start the share process, click the grey 🔗 **Share** button.

   A "Will you allow..." dialog box appears at the top of the Firefox screen.

Screen sharing control

3. If you have only one screen, click the **Screen to share** drop-down arrow and select "Entire screen".

   If you have more than one screen, click the **Screen to share** drop-down arrow and select which screen you want to share.

   A small image of your selected screen appears in the dialog box along with a warning message.

4. To permit Firefox to share the selected screen, click **Allow**.

   In your browser, a flashing "shared" icon 🔳 appears in the address bar and the video window **Share** button appears white 🔗. The shared content appears in a small image at the top left of the video window.

   For other participants, the shared screen replaces your image in their large video pane and your image appears as a thumbnail image in the top left corner. They can switch between the shared content and your image in the large video pane by clicking the 🔽 **Expand** button or anywhere in the thumbnail image.

5. To expand the shared content thumbnail to appear in the larger video panel, click the 🔽 **Expand** button or anywhere in the thumbnail image.

6. To stop sharing content, click the white 🔗 **Share** button in the video window toolbar.
